## ACKNOWLEDGEMENTS

I gratefully acknowledge the financial support of the Netherlands Organization for the Advancement of Pure Research (ZWO, Den Haag, The Netherlands), and of the Delft University of Technology.

I thank the people from Ericsson, PTI, and ITT/BTMC, and especially Prof. H.H. Adelaar and Dr. R.T. Boute, for their friendly cooperation and the discussions I could have with them.

I thank mr. W.Th.J. van Kan and mr. G. van Berkel for the careful drawing of the figures in this thesis.

I thank mrs. Susan Massotty for the conscientious correcting of the English text. I thank mrs. Angelina de Wit for the accurate typing of the text.

I am most grateful for the cooperation and kind support I had from the members of the Automatic Traffic Systems Laboratory (AVS) of the Delft University of Technology during all phases of my work.
